Grails – Die beste Wahl im Web

Dierk König

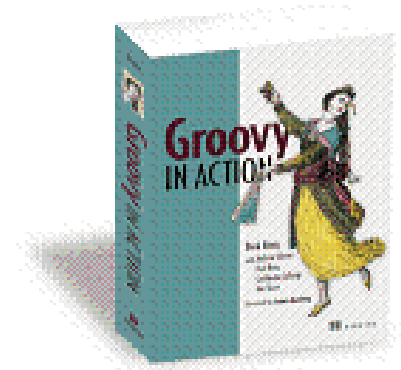

dierk.koenig@canoo.com

Welcome!

Dierk König

- Canoo Engineering AG, Basel (CH)
 - Rich Internet Applications products, projects, consulting, training
www.canoo.com
- Trainer, consultant, developer
- Committer to Groovy and Grails
- Lead author: Groovy in Action

Grails – more than a web framework

- **Be simple**
minimal installation, convention over configuration, DRY
- **Stand on the shoulder of giants**
JavaEE, Spring (DI, MVC, WebFlow), Hibernate
- **Keep the Java perspective**
driven by the domain model, standard war deployment, allow Groovy and Java models, reuse existing models
- **Be a rich platform**
jobs, services, taglibs, templates, filters, plugins, build system, scripting, scaffolding, testing (all flavors), AJAX, URL mapping, ORM mapping, content negotiation,...

So much for the slideware

- Prerequisite: **Java 1.4+ SDK**
- Download from grails.org
- Set **GRAILS_HOME**
- Add `GRAILS_HOME\bin` to **PATH**
- That's it!
Comes with web server and DB
No messing with registry
